## The Gamewell Fire Alarm

PUBLIC INDIGNATION OVER THE POLICE COMMISSIONERS OF PROPERTY OWNERS NOT OBTAINED. THE TOWN COMMITTEE WILL NOT ACCEPT THE SYSTEM UNTIL CONSENTS SIGNED BY PROPERTY OWNERS ARE PLACED BEFORE THEM.

The rapidity with which the Gamewell Fire Alarm Company have erected their poles and strung their wires through the town during the past week has been a matter of astonishment. Mutterings of indignation are already coming in thick and fast upon the Town Committee who as guardians and representatives of the interests of the public are naturally looked to for the protection of those interests.

A conspicuous instance of the utter disregard of public rights is noticeable in the poles erected along the Park. If there is any one particular spot in the town that is more jealously guarded, it is the beautiful Park. A decent regard for public sentiment ought to have prompted the Company to consult the Township Committee before placing their poles there.

Nothing of the kind was done, however. The instances are numerous in which private rights have been invaded by the Company.

On Watkinson Avenue Mr. John H. Emery of Newark has charge of an extensive tract of property. Mr. Emery had no objection to the poles erected on his property. The only question raised by him was that the company keep their poles a certain distance from the fence line in order to allow for a sidewalk and that the company refrain from damaging the trees. Mr. Emery of course expected to be consulted in the matter before the work was commenced.

The company went ahead without asking his permission, placed the poles where they pleased, and hewed the trees to suit themselves. If Mr. Emery orders those poles cut down, who is going to be the loser, the town or the Fire Alarm Co.?

The Willow Street Company deliberately entered on the Strand Estate and erected a pole close to the house without consulting the owners. Miss Carrie Strong threatened to chop down the pole.

It may be that the chopping down will not occur until after the Fire Alarm Company have paid the money when the loss will come on the town.

On Washington Place, a street not accepted by the town, poles have been erected in which there is not the least doubt that the property owners may cut them down if they please.

Wires have been strung on trees over the Glen Ridge property company's property. There is no assurance given that the trees will never be cut down and the town be compelled to get right of way the best way it can. Telephone and telegraph company poles have been used in some instances. The town officials have no assurance that the company will take down or erect a pole for the use of the poles. The Fire Alarm Company cannot plead ignorance of the law in this matter. When the question of establishing a fire alarm system in the town is brought up, Mr. Torrey, the agent of the company, assured the committee that the company were well acquainted with the law on the subject. They realized that it was a matter between themselves and the property owners.

The president of the company was also before the committee and Mr. Ward, chairman of the Township Committee, distinctly told him that the Township Committee would not nor could not give consent to the erection of poles on the streets. The property owners, however, who own the land on which the poles are to be erected, have no objection to the poles. When Mr. Torrey applied for permission for the New York and New Jersey Telephone Company to erect poles in lieu of the Gamewell Company's poles the whole matter was again given over and the absolute right of the property owner to designate a route after which the company would deal with the property owners individually.

The ordinance was passed. The company labored with the property owners without success and finally gave the matter up. It is very evident that if the committee accepts the Fire Alarm system the present committee they are accepting an immense amount of possible law suits. The grave question arises what has the Gamewell Company got to turn over to the town? Suppose the committee accepted the system in its present state and in a week following the erection of poles whose consent to the erection of poles has not been obtained should attempt for their removal or should exercise their right to remove them. The action of the company in the present case, regardless of the fact that the poles are erected singly, particularly so when in the first instance their agent professed to have a clear understanding of the whole matter.

The Fire Alarm Company have given the matter a great deal of attention and have decided not to erect poles on the streets until the company shall place before them the consent in writing of every property owner in front of whose property poles have been erected, that he, she or they are satisfied to have them remain there. The consents will also be required in the erection of a pole on the street. Written consents will also be required from the owners of the property on the street. The company's rights cannot be maintained. The company's rights cannot be maintained. The company's rights cannot be maintained.
